# iMac DV (Summer 2000) Colored Service Parts

**Top Rear Housing**

- 922-4245 Graphite
- 922-4246 Snow
- 922-4247 Indigo
- 922-4248 Ruby
- 922-4249 Sage

**Front Outer Bezel**

- 922-4251 Graphite
- 922-4252 Snow
- 922-4253 Indigo
- 922-4254 Ruby
- 922-4255 Sage

**Speaker L and R Kit**  
076-0820

**Bottom Housing  
W/Flip Foot**

- 922-4239 Graphite
- 922-4240 Snow
- 922-4241 Indigo
- 922-4242 Ruby
- 922-4243 Sage

**RAM Access Door**

- 922-4281 Graphite
- 922-4282 Snow
- 922-4283 Indigo
- 922-4284 Ruby
- 922-4285 Sage

**Keyboard, Professional**  
922-4229

**Mouse, Pro**

- 922-4230 Graphite

## iMac DV (Summer 2000) Screw Matrix

## Screws Locator

- ① 922-4144 (4), CD/HD Carrier to Divider Panel 
- ② 922-4145 (4), CD/DVD Carrier—CD to Drive to Carrier 
- ③ 922-4146 CD Adapter Board (2) 
- ④ 922-4147 HD to HD Carrier (4) 
- ⑤ 922-4148 I/O Panel (2) Main Logic Board (1) 
- ⑥ 922-4149 EMI Cover (6) 
- ⑦ 922-4150 Antenna Clip (1), Down Converter Board (2) (in front of Down Converter Heat sink) 
- ⑧ 922-4151 Inner Bezel & Side Panels to Divider Panel (4) 
- ⑨ 922-4152 Screws, Top Rear Housing, (2) Bottom Housing (near VGA Port), Side Panels (2ea) (R & L) to Inner Bezel sides of CRT 
- ⑩ 922-4153 Front Outer Bezel (2) to Inner Bezel (under front caps) 
- ⑪ 922-4154 CRT to Inner Bezel (4) 
- ⑫ 922-4155 Antenna Board (2), Main Logic Board (6), Down Converter (4), Analog Board (6) Modem (1) 
- ⑬ 922-4157 Audio Cable (2) to Divider Panel & RGB Cable (2) on Pwr/Analog Board 

## Power/Analog/Video Board Switch

There are two part numbers in service stock for the power/analog/video board on the iMac DV computers (Summer 2000) because there are two vendors manufacturing the boards. The part numbers are 661-2347 and 661-2370. These boards must be exchanged like-for-like.

The 661-2347 board (Figure 1) has a switch at location SW901 that must be set for the type of CRT tube in the computer. The switch settings are silk-screened on the board near SW901. If this power/analog/video board or the CRT are replaced, make sure to set the switch to the appropriate position (either to LG or CPT). Refer to the next page for CRT identification information.

**Figure 1 Power/Analog/Video Board 661-2347**

# CRT Identification

One way to identify which type of CRT tube you have in the computer is to look at the black plastic molding on the CRT neck. The LG (Figure 1) and CPT (Figure 2) tubes have different molding on the neck. Set the switch on the 661-2347 analog board according to the type of CRT tube in the computer.

Figure 1 LG CRT Plastic Molding

Figure 2 CPT CRT Plastic Molding

# Recycling Information

The plastic resin markings (in red) below identify the type of resin used in each part, in accordance with the voluntary ISO standards 11469 and 1043. By marking plastic parts according to one or both of these standards, recyclers can more easily separate different plastics efficiently and with less cost. For example, >PC-FR< indicates that the part is made out of flame retardant polycarbonate. Recycle the plastic part according to local recycling regulations and programs. Refer to your local recycling center for further information.

**Note:**  
The Service part number is listed along with the plastic resin markings (in red text). The resin markings identify what type of plastic is used in each part.
